MAX Your Software Implementation with Proven Best Business Practices

Taking a typical approach to implementing enterprise software presents challenges for most companies, including:

- Limited time and resources to implement and learn the system
- Budget constraints and ability to achieve expected results
- ROI with a system that can expand as the business expands

A typical approach may not address the operational needs of your business today, especially if it requires you to invest heavily in designing business practices – expecting your employees to shoulder the bulk of the work and you to manage the day-to-day implementation activities.

Take the Path Well Traveled:

A better option is RTP’s MAX. Designed specifically to optimize your investment in the RTP|ONE solution, MAX is a proven implementation approach that assimilates learnings and best business practices from more than 100 global customers.

With MAX, you benefit from:

- An efficient approach with proven best business practices
- A scalable solution that you can continue to adapt and grow over time
- Comprehensive knowledge transfer
- Flexible post go-live support

Common Challenge	RTP’s MAX Solution	Value
Endless configuration choices and decisions bog down the process and delay our go live.	This efficient approach provides lab-based configuration, built-in testing, and validation and checkpoint milestones.	<ul style="list-style-type: none"> • Achieve the benefits from the new system sooner with MAX.
A majority of the functions are common to many businesses yet have to be reinvented for every implementation.	Industry best practices are used to establish preset values. The system is tested and verified by RTP prior to implementation.	<ul style="list-style-type: none"> • Spend time on the elements that are unique to your business instead of focusing on common business practices. • Benefit from global best practices.
The system is only built for our current business needs, but they are constantly changing. We need to automate and improve business processes over time.	RTP offers system optimization workshops to identify ways to better use the software and to scale business as it expands and changes.	<ul style="list-style-type: none"> • Grow and flex your solution as your business scales instead of casting a static solution in concrete.
My staff doesn’t know how to operate the system.	RTP provides comprehensive classroom and web-based training. Comprehensive documentation is also available online.	<ul style="list-style-type: none"> • Educate staff quickly and easily so they are ready to use the system immediately.
Season startups and staffing create huge challenges.	Customers can choose to use RTP’s Managed Services to assist with typical support functions of the system after go live.	<ul style="list-style-type: none"> • Supplement staff during peak times without hiring employees. • Access to on-demand training gets new employees online quickly.
